

Call for Posters/Demos

ICNP 2016 will hold a poster and demo session to showcase not only "work-in-progress" but also ideas presented in the main conference. The poster/demo session has been a successful regular event at ICNP in past years. These sessions will provide a great chance for students and researchers to obtain feedback on their ongoing research from knowledgeable conference attendees. While posters and demos are welcome from everyone, for the poster sessions we particularly encourage ongoing work in which the primary contributor (i.e., first author) is a student. Extended (2 page) abstracts of the posters or Extended (2 page) description of the demo should be submitted in the Portable Document Format (PDF) only, and they will be reviewed by members of the Poster/Demo Session Committee. The abstracts of accepted posters and demos will be included in the proceedings and in IEEE eXplore.

At the conference, posters/demos must be presented by one of the co-authors. Posters and demos submitted to this call for papers should contain unpublished original ideas and not be abbreviations of published papers (except the papers to be presented in ICNP 2016). Note that acceptance and presentation of a poster or demo contain original ideas at ICNP 2016 will not prevent authors from publishing a more complete version of their ideas in future conferences and journals.

Authors of selected demos are expected to send an email to the chairs (icnp16postersdemos@gmail.com) with a list of requirements to ensure that it can be arranged.

Chairs

Fangming Liu, Huazhong University of Science and Technology, China
Jun Luo, Nanyang Technological University, Singapore

Important dates

Submission deadline: August 3, 2016
Notification of acceptance: August 17, 2016
Final version of abstracts: September 2, 2016

Where to submit?

By email to: icnp16postersdemos@gmail.com
Use subject line: ICNP 2016 poster submission or ICNP 2016 demo submission accordingly

Registration

At least one of the poster/demo co-authors must be registered for the conference to present the poster/demo. Students may register for the conference at the student rate for presenting posters/demo (if they are not presenting a full paper in the conference which requires a full registration).

What the final poster should look like?

We define a poster to be A0 (http://en.wikipedia.org/wiki/Paper_size), i.e 841mm × 1189mm or 33.11in × 46.81in, on which you can affix visually appealing material that describes your research. You can arrange the space and orient the poster either horizontally or vertically. You should prepare the best material (visually appealing and succinct) that effectively communicates your research problem, techniques, results, and what is novel and important about your work. You are responsible for printing your poster and bringing it to the conference site. We will provide stands for you to mount your poster materials on.
